

NetSuite for Professional Services

Meeting the Demands of your Clients is a Full-time Job

Stay ahead of the curve and deliver outstanding experiences to your clients

For thriving companies in the services industry, buying the right enterprise and business software can make all the difference between maintaining the status quo and scaling to the next level. Just as important to success, however, is the implementation partner. While the software provides the platform you need to scale, your services partner enables the transformation of your business.

Progressive and innovative services firms are looking to create new business models that disrupt the status quo. They are licensing their intellectual property and diversifying and expanding their revenue streams with new offerings and recurring revenue. They want to provide solutions, software and intellectual property on a subscription-based managed service. They are looking to extend and secure the lifecycle of that engagement through recurring revenue.

As the #1 vendor of cloud-based solutions for professional services organisations, NetSuite's ERP, PSA and SRP software solutions enable you to have a comprehensive view of sales, service, financials and support to drive high performance in professional services organisations.

A entirely end-to-end, integrated solution, encompassing Project Management, Resource Management, Project Accounting, Time sheet & Expense Management and Analytics, offering powerful tools to help you manage your projects, resources and finances.

WHY NOBLUE

We have acquired a deep understanding of your practice, changing regulations, and the challenges you face. Like you, we are a professional service firm that provides solutions to a wide variety of clients in our industry. We understand your business and operational challenges and have knowledge of industry best practices - because we have been there.

Our clients are our best asset; thus, we ensure our team has the knowledge and skills to bring true value and advise wisely to get you the right software at the right budget.

We focus not only on providing solutions that fit your business perfectly, but also support you now and years down the line.

Our experts will work closely with you, show you best practice and will take the time to fully understand your business' specific requirements and how you are looking to grow to develop a tailored suite of IT that integrates seamlessly with your operations.
